

# Ro-Flo Lubrication Systems

**Sloan Lubrication Systems is the only manufacturer recommended lubrication system for Ro-Flo rotary compressor applications.**

Sloan Lubrication Systems are engineered for your Ro-Flo application requirements to speed installation and minimize costs. Our Ro-Flo Lubrication systems provide precision lubricant delivery and fail-safe protection in a custom engineered design.

## Services Offered:

- System engineering and design
- Turnkey systems or component kits
- High specification systems
- 3D system modeling
- Operations and maintenance training
- Preventative maintenance and troubleshooting
- Replacement parts and upgrades

## Ordering Information

For assistance with your Ro-Flo Lubrication Systems, please contact our team at [Sales@Ro-Flo.com](mailto:Sales@Ro-Flo.com) or by phone at 920-574-2651.

For new applications, please submit Ro-Flo provided performance sheets

For help with existing systems, please have as much of this information as possible and we will be ready to help.

- Ro-Flo Model number
- Date codes of installed lube components – including divider blocks

## Custom options for your application:

- **A range of systems:**
  - » Turnkey skids with integrated tank
  - » Equipment mounted systems with remote divider blocks for user provided external supply tank
  - » Components for DIY systems
  - » Single and dual zone for tandem Ro-Flo applications
- **Drive types:**
  - » Electric motor
  - » Belt
- Available for hazardous locations, UL, IEC, ATEX
- Discrete system mounted monitoring or PLC integration
- Voltage - DC, AC Single or 3 phase
- Built in electrical controls / prewiring for integration with customer provided controls
- Spares and PM component kits
